

Callaway purchases new Corvettes each year for product development and testing. We sell these cars annually. And we continue to support them with long and generous warranty periods to backup our statements about dependability and reliability

We have a remarkable track record of happy owners of past development cars. We invite you to read their testimonials. These cars have a special value because they represent the best that Callaway does, and they were the actual subjects of worldwide press.

If you are a candidate for a Callaway Corvette or a Callaway C16 development car, please contact us and we'll notify you as they become available. Call 860 434 9002 or email Joanne Mercer
