This car has been in service as our dealer demonstrator. She has been used rigorously and intelligently, going to Callaway Dealers as our calling card.

Mechanically and cosmetically freshened at Callaway Cars.

Maintained in first-class condition as she showcases the best we have.

**Callaway purchases new** Corvettes each year for product development and testing. We sell these cars annually. And we continue to support them with long and generous warranty periods to backup our statements about dependability and reliability

We have a remarkable track record of happy owners of past development cars. We invite you to read their testimonials. These cars have a special value because they represent the best that Callaway builds, and they were the actual subjects of worldwide press.

If you are a candidate for a Callaway Corvette or a Callaway C16 development car, please contact us and we'll notify you as they become available.
